Scholar Deet

A virtual classroom that feels easy to use

Enjoy smooth live learning with crisp video and simple classroom controls that keep everyone in sync.

OVERVIEW

Project Overview

Scholar Deet is a professional virtual classroom platform built to make live teaching and learning feel smooth and natural. It brings together high-definition video streaming and synced classroom controls to create a reliable space for remote classes, classroom management, and strong student engagement.

Key Focus

Minimalist Design

Clear, high-density information without the clutter, so learners can stay focused on what matters most.

Unobstructed Learning

A smooth experience that gets out of the way and helps instructors and students connect easily.

Modern Digital Pedagogy

Practical tools made for the way people teach and learn online today.

Target Users

Instructors and students in live online classes who need a dependable, professional virtual classroom.

It's designed to feel easy for everyone, whether you're tech-savvy or not, while still giving you plenty of control.

INSTRUCTOR

Core Features: Instructor Experience

All-in-One Dashboard

See the big picture at a glance with real-time stats like how many sessions you've led, how many students you've reached, and current attendance.

Session History

Keep track of past sessions with clear timestamps and student counts, so it's easy to review what happened and when.

Performance Analytics

Use simple, interactive charts to spot attendance trends and see how students are engaging over time.

Classroom Control Tools

Quickly mute everyone, lock or unlock the chat, and pin important messages to help keep the session running smoothly.

Automated Reporting

Generate and download polished PDF session summaries with attendance logs, session length, and other key details.

STUDENT & CLASSROOM

Core Features: Student Experience & Synchronized Logic

Student Experience

Easy to Join

Jump in right away with a unique 6-character session IDno account needed.

Hardware Check Lobby

Test your microphone and camera before entering the live session, so you know everything's working.

Ways to Participate

Raise your hand in real time and enjoy smooth, high-quality video and audio throughout the session.

Chat Participation

Use the built-in chat to connect with the instructor and classmates during live sessions.

Synchronized Classroom Logic

Shared Session Timer

A server-synced clock keeps session time consistent for everyone.

Automatic Attendance Tracking

Join and leave times are logged automatically, so attendance stays accurate without extra work.

Chat Moderation

A built-in profanity filter helps keep conversations respectful and on track.

Real-Time Sync

Updates happen live across the classroom, so everyone stays in step with the same experience.

ARCHITECTURE

Technical Architecture

Frontend Technologies

Framework	React
Language	TypeScript
Styling	Tailwind CSS
UI Components	Radix UI + Shadcn/UI
Animations	Framer Motion

Backend & Infrastructure

Real-Time Sync	Firebase Realtime Database
Video & Audio	Agora RTC SDK
Hosting	Vercel (Serverless)

Why It Works Well

- Fast and responsive
- Reliable when it matters
- Built for real-time updates

Scholar Deet's setup is built for live learning — it blends Firebase for instant updates, Agora for smooth video and audio, and a modern React app to keep the classroom experience simple, fast, and dependable.
